

# Sukulu's Wildlife Immobilization Course

This 10 day course on Sukulu Reserve is a unique opportunity for veterinary students to get a hands-on experience in wildlife immobilization and white rhino dehorning operations.

## **What?**

An experience of a lifetime to work alongside wildlife veterinarians and conservationists in rhino immobilization and dehorning operations. During this 10 day course students will gain technical knowledge and skills through theoretical lectures and hands-on field work in small groups of maximum 10 students. The aim of the course is to expose students to the behind scenes of veterinary wildlife practices and conservation, to learn about the immobilization and capture techniques used in various wildlife

species and to work with endangered species in anti-poaching procedures. Besides the technical learning aspects, the course also allows for some leisure activities and wildlife viewing too, making this a complete African experience!

## **Who?**

Students from any veterinary faculty in the world, and any year of study, are welcome to attend. The course is facilitated in English.

## **When?**

Course 1  
8 – 18<sup>th</sup> of May 2022
